

IN THE ABSTRACT

Please change the Abstract to read as follows:

An image processing apparatus includes a reproducing unit and a determining unit, wherein the reproducing unit ~~which~~ reproduces a part of a moving image from a storage medium during a predetermined reproduction time[; and a] , and the determining unit ~~which~~ determines whether [[or not]] a predetermined button is pressed before the predetermined reproduction time is passed. The reproducing unit reproduces not only the part of the moving image but also starts reproduction of the remaining part of the moving image, if the determining unit determines that the predetermined button is pressed before the predetermined reproduction time is passed.
